Course description:

This is a fast-paced 8-week online course in which students will learn how to effectively apply advanced concepts related to pet nutrition and disease, including the metabolism within healthy and diseased dogs and cats, how nutrition may aid in preventing and treating disease, and the science behind use of nutraceutical ingredients in diet formulation and manufacturing. Students will develop critical-thinking and problem-solving skills by applying the concepts taught in this course using real-world scenarios.

Course objectives:

1. Understand the importance of obtaining a dietary history and learn how veterinarians apply nutritional assessment guidelines to manage healthy and diseased dogs and cats.

2. Understand and apply advanced concepts pertaining to canine and feline metabolism and nutrition, including the role of diet in clinical disease.

3. Use evidence-based nutrition and medicine from peer-reviewed literature to effectively design specialized pet food products and/or evaluate pet food labels and claims.

4. Effectively evaluate and apply peer-reviewed literature to “real world” situations.
**Course modules and learning goals**

- Understand risk factors and pathogenesis of chronic conditions discussed
- Recognize physiological and metabolic alterations due to disease status or stage
- Become familiar with diagnostic tools and assessment
- Explore goals of dietary strategies to support animals with chronic diseases

---

**Modules 1 – 4: Taught by Dr. Kelly Swanson**

**Module 1**
**Interpreting and Critiquing Peer-Reviewed Literature**
**Essential Nutrients of Dogs and Cats**
**Pet Food Research and Development of Specialized Diets**

**Module 2**
**Therapeutic Diet Strategies: Diabetes Mellitus**
**Therapeutic Diet Strategies: Obesity and Metabolic Health**

**Module 3**
**Therapeutic Diet Strategies: Chronic Kidney Disease**
**Therapeutic Diet Strategies: Feline Lower Urinary Tract Diseases**

**Module 4**
**Therapeutic Diet Strategies: Gastrointestinal Diseases**
**Breed-Specific Diet Strategies for Dogs and Cats**
Modules 5 – 8: Taught by Dr. Maria Godoy

Module 5

Therapeutic Dietary Strategies: Mobility and Osteoarthritis

- Define normal physiological processes and organ function during health
- Describe disease etiology, risk factors, and common clinical symptoms
- Understand onset and physiological and (or) morphological processes associated with disease progression
- Discuss treatment options and examine dietary management strategies
- Analyze and appraise current literature on this topic.
- Appreciate veterinarian perspective on therapeutic nutrition assessment and guidelines of pet animals

Module 6

Therapeutic Dietary Strategies: Oral Health and Periodontal Disease

Therapeutic Dietary Strategies: Food Allergy

Module 7

Therapeutic Dietary Strategies: Aging Pets

Therapeutic Dietary Strategies: Cognitive Function

Module 8

Therapeutic Nutrition: Veterinary Perspective
Overview Course Activities

The “Getting to know you” assignment provides an opportunity for students to introduce themselves and build an online community during this course. More detailed guidelines are provided on Compass, including a few tips of how to complete this assignment.

Eight weekly quizzes will be given on Compass. Content covered in each quiz is not cumulative – it will only reflect the content of the module being covered that week. Each quiz is worth 15 points.

There will be two exams. Both exams will be comprised of multiple-choice, matching, true/false, and short answer type questions, and will be worth 100 points each. The first exam will cover lecture material from modules 1 through 4, and the second exam will cover modules 5 through 8.

Weekly assignments will allow students to critically appraise information and apply concepts learned in this course through evaluation of case-studies or specific scenarios using real-world examples.

Every Wednesday evening from 8 to 10 pm CT, weekly live discussion sessions via Zoom will be held. Drs. Godoy and Swanson will be available during this time to answer questions pertaining to the course material.

Course Grading

The proportion of student’s points earned in relation to total points will be translated to the grade scale to the left.

<table>
<thead>
<tr>
<th>Grade Scale</th>
<th>Total Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>A: &gt; 90%</td>
<td>500</td>
</tr>
<tr>
<td>B: 80-89.9%</td>
<td></td>
</tr>
<tr>
<td>C: 70-79.9%</td>
<td></td>
</tr>
<tr>
<td>D: 60-69.9%</td>
<td></td>
</tr>
<tr>
<td>F: &lt; 60%</td>
<td></td>
</tr>
</tbody>
</table>

Note: Students with special needs should notify the instructors during the first week of class, so adjustments can be made early in the semester. All requests for reasonable accommodations should be directed to the Disability Resources and Educational Services (DRES) Student Services Office (via phone: 217-333-1970; email: disability@illinois.edu; or website: www.disability.illinois.edu/).

Suggested texts (not required)

Additional University Policies

University Policy on Academic Integrity: The University of Illinois at Urbana-Champaign Student Code should be considered as a part of this syllabus. Students should pay particular attention to Article 1, Part 4: Academic Integrity. Read the Code at the following URL: http://studentcode.illinois.edu/.

Family Educational Rights and Privacy Act (FERPA): Any student who has suppressed their directory information pursuant to Family Educational Rights and Privacy Act (FERPA) should self-identify to the instructor to ensure protection of the privacy of their attendance in this course. See http://registrar.illinois.edu/ferpa for more information on FERPA.
