

The Science, Pre-Veterinary and Medical concentration is designed for students interested in graduate school or professional training after the undergraduate degree. It allows the student flexibility to choose courses that will satisfy most entrance requirements to post-graduate programs and emphasizes basic science courses. The concentration enables a student to complete all of the pre-veterinary science requirements while working toward their degree.

Electives:

In addition to the requirements above, you will need to take a certain number of electives that will help you reach the 126 credit hours that are needed to graduate. Students may wish to pursue a minor or take courses in a subject they have a strong interest. A large majority of our students wish to enter Veterinary School after their bachelor's degree.

The following courses will be needed to enter Vet School here at the University of Illinois:

- | | |
|---------------------------------------------|-------------------------------------------------------|
| CHEM 232 & 233 — Organic Chemistry with Lab | PHYS 101 & 102 — Physics I and II |
| MCB 450 — Biochemistry | Biology with Lab — IB 150/151, MCB 150/151, or IB 104 |

If you wish to pursue Veterinary School, it is important you research the requirements of the vet school(s) you wish to attend. The above list does not encompass the requirements at every school.
